

Fionah

Civil Engineer

Hi! I'm Fionah and I'm fascinated by built structures, both historical and modern. I hope to use my **analytical** skills to design sustainable structures, like roads, bridges, towers and dams, to last for years and years. I love engineering as we can bring ideas to life to help make the world a better place. **Team work** and good **communication** are critical to turn designs into reality.

I am fascinated by structures.
