## Software Engineer

Hi! I'm Sara and I'm on a mission to see if anybody lives on other planets. I'm **passionate** about space and my **curiosity** led me to develop instruments to help us learn more about Mars. Space exploration is always very **cooperative** working with engineers from all around the world. Being part of a space mission is amazing and that is why I love engineering.

I'm on a mission to see if anybody lives on Mars.
