

Salma

Electrical Engineer

Hi! I'm Salma and I teach people how to make electricity with renewable energy. Renewable energy technology is rapidly developing and I love finding out about new discoveries and the **innovative** changes. I have to be **creative** and **adaptable** in finding the best way to explain my knowledge to students. I love engineering as I enjoy solving problems, especially when the solution will help people and the environment.

The illustration features a woman named Salma in the foreground, wearing a brown hijab and an orange top, with a friendly expression. The background is a stylized landscape with green hills, a blue river, and several green trees. In the sky, there is a large yellow sun with a white lightning bolt, a white cloud, and a brown wind turbine with three blades and blue curved lines indicating wind. A white speech bubble with a blue border is positioned near the wind turbine, containing the text: "I teach people how to make electricity with renewable energy."

I teach people how to make electricity with renewable energy.
