

# Sarah

## Electrical Engineer

Hi! I'm Sarah and I make planes safer by developing ways to help pilots spot and avoid other objects in the sky. I am **curious** about how things work, and enjoy designing new laser systems. **Communication** is essential as we work in a team to go from the ideas stage to finished product. My **enthusiasm** for engineering comes from the fact that it allows me to be part of creating a more interesting future.

The background is a vibrant blue sky with a large yellow sun in the top right corner containing a white lightning bolt. There are several white, fluffy clouds scattered throughout. In the center-left, an orange fighter jet is flying towards the right, leaving a white smoke trail. Below the jet, there are green hills and a blue body of water with white wavy lines representing waves. In the bottom right foreground, a woman with long dark hair, wearing a maroon top and small earrings, is smiling. A white speech bubble points to her from the text below.

I help keep pilots safe when flying
